PROFESSIONAL SUMMARY

Junior Frontend Developer with practical experience building responsive web applications using React, JavaScript, Tailwind CSS, and Vite. Experienced in component-based development, API integration, file uploads, interactive user interfaces, and connecting frontend applications to backend services. Built projects including SmartTestHub, a smart-contract testing platform, and a web-based sound recorder. Familiar with Git, REST APIs, and modern web development workflows. Seeking a Junior React Developer or Frontend Developer role to build useful products, contribute to development teams, and continue growing as a software engineer.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Build tools: Vite, npm
Frontend development: Reusable components, props, state management, hooks, conditional rendering, responsive design, form handling
API integration: REST APIs, JSON, asynchronous requests, frontend-backend integration
Backend familiarity: FastAPI, Node.js, Express.js
Databases: MongoDB, MongoDB Atlas
Developer tools: Git, GitHub, Postman, VS Code
Deployment: Vercel, Render,

PROJECTS

1. SmartTestHub — Smart Contract Testing Platform | React, JavaScript, Tailwind CSS, Vite, FastAPI

- Developed the frontend interface for a platform designed to support smart-contract testing and analysis across multiple blockchain ecosystems.
- Built interfaces for contract uploads, contract-type selection, and file validation.
- Implemented drag-and-drop file selection and file-extension validation for supported contract types.
- Integrated the frontend with backend upload endpoints using multipart form data.
- Worked on upload feedback, progress indicators, error handling, and API response presentation.
- Designed interfaces for presenting security findings, vulnerabilities, code-quality observations, test results, and AI-generated summaries.
- Worked with support for Solidity, Rust, Cairo, and Python-based contract files.
- Troubleshot frontend-backend connectivity, including API validation and cross-origin resource sharing (CORS) issues.

Project link:https://smarttest-hub.vercel.app/

2. Sound Recorder Web Application | React, JavaScript, Tailwind CSS, Vite, Node.js, Express.js, MongoDB Atlas, GridFS

- Developed a web-based sound recording application using React and the browser's MediaRecorder API.
- Worked on the user interface for recording and managing audio.
- Used React components and state to support interactive recording workflows.
- Worked with a Node.js and Express backend for audio-related requests.
- Used MongoDB Atlas and GridFS in the application's file-storage architecture.
- Focused on creating a responsive, straightforward interface for users to interact with audio features.

Project link: https://my-project-seven-lilac.vercel.app/

3. Personal Portfolio Website | React, JavaScript, HTML, CSS, Tailwind CSS where applicable

- Worked on a personal portfolio to present frontend development skills and projects.
- Organized content to showcase projects, technical skills, and professional experience.
- Applied responsive design principles to support different screen sizes.
- Focused on clear navigation and professional presentation of work.

PROFESSIONAL EXPERIENCE

CONNECT LOUD — Frontend Developer Intern / Project Support
3 September 2024 – 3 December 2024

- Assisted with frontend development tasks for software projects.
- Contributed to building and refining user interfaces.
- Supported project testing to identify functional issues and improve application quality.

- Collaborated with project team members to review application behaviour and resolve reported issues.
- Gained practical exposure to software development workflows, testing, and team collaboration.

EDUCATION

Kwame Nkrumah University of Science and Technology (KNUST), Ghana

Qualification: Computer Engineering | Graduation Year: 2025

ADDITIONAL COMPETENCIES

- Problem-solving and analytical thinking
- Attention to detail
- Team collaboration and communication
- Independent learning and technical research
- Debugging and troubleshooting
- Willingness to learn new tools and development practices
